

# TURN IT UP

CISCO *Live!*

The bridge to possible

# How to leverage Cisco IOx to host your application?

## Microservices at the Networks Edge

Daniel Eckstein, TME / Solution Architect

DEVWKS-2934

# Agenda

- Introduction
- What is IOx?
- What is a DevNet Sandbox?
- Let's prepare and install an application!
- Conclusion and Next Steps

# Introduction

# About our workshop

## We will:

- Familiarize with Cisco IOx
- Get to know Cisco DevNet Sandboxes
- Prepare, install and operate your application to IOx

## We will not:

- Use an automated control-plane or build-pipeline
- Optimize the application or the application image

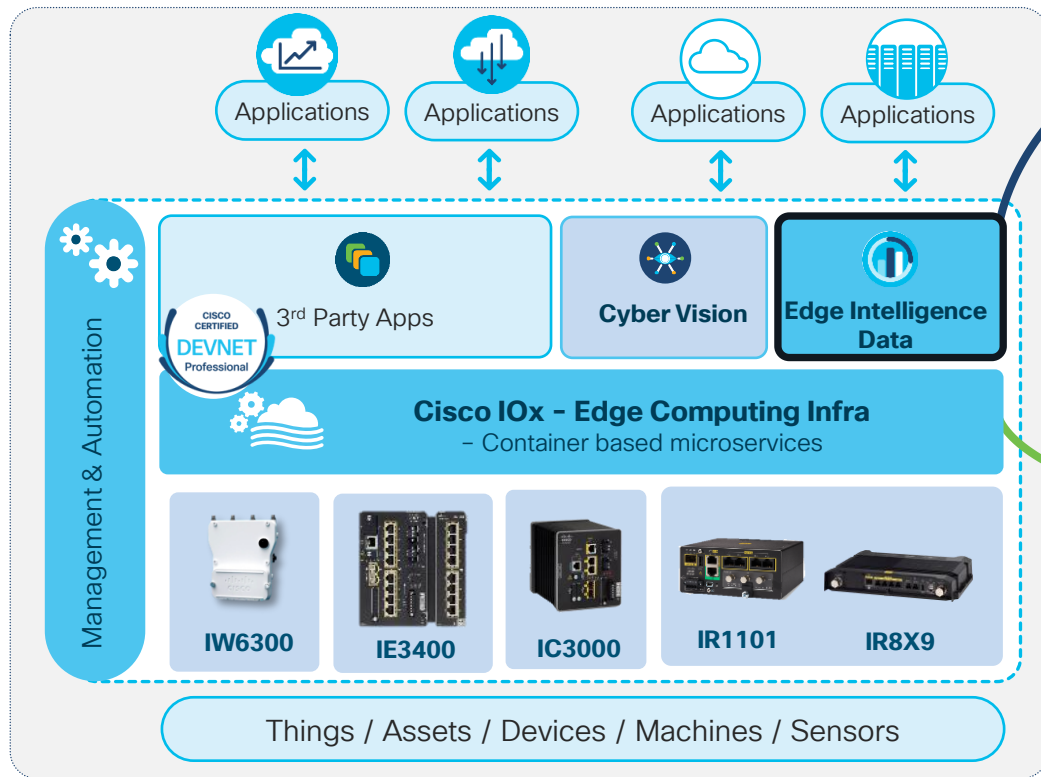

# Please...

- If you have questions, don't hesitate to ask!
- If you don't want to ask during the workshop, I will be around!
- If you want to exchange later: [daeckste@cisco.com](mailto:daeckste@cisco.com)
- Do not follow the guide blindly!

# What is IOx?

# Cisco IOx

{Buy}

## Get Started Fast

Using Cisco Edge Intelligence for edge data processing is the fastest and easiest way to process and send data from the edge

{Or Build}

## Your Own App

Using Cisco IOx compute infrastructure and development environment you can build your own Docker app that runs at the edge. You manage the lifecycle of your application and monitor its operation.

# Cisco IOx – Summary

- Cisco IOx
  - is short for “Cisco IOS + Linux”
  - allows you to host custom applications
  - grants your application a share of the device-resources
  - provides access to subsystems and subtended devices
  - is being supported on many devices from the Cisco portfolio
- Applications
  - can be created in VM-style or Docker-style
  - can be managed via CLI, IoT OD or Local-Manager

See: <https://www.cisco.com/c/en/us/products/cloud-systems-management/iox/index.html>

# What is a DevNet Sandbox?

# Cisco DevNet

- DevNet supports Developers with various resources

- DevNet covers all areas of Cisco Business

# Cisco DevNet - Sandbox

The screenshot displays the Cisco DevNet Sandbox Labs interface. The top navigation bar includes the Cisco DevNet logo, 'SANDBOX LABS', 'RESERVATIONS', and user information 'DAECKSTE' and 'DEVNET'. A search bar is located on the left. The main content area is titled 'IoT (14)' and shows a grid of 10 sandbox labs, each with a green card, a version number, a title, a description, and a 'RESERVE' button. The labs are arranged in two rows of five. The right sidebar shows a folder icon for 'IoT' and a list of 'ALL CATEGORIES' including Networking, Collaboration, IoT, Data Center, Cloud, Security, and Open Source. A status indicator at the bottom right shows '1 Currently reserved by me'.

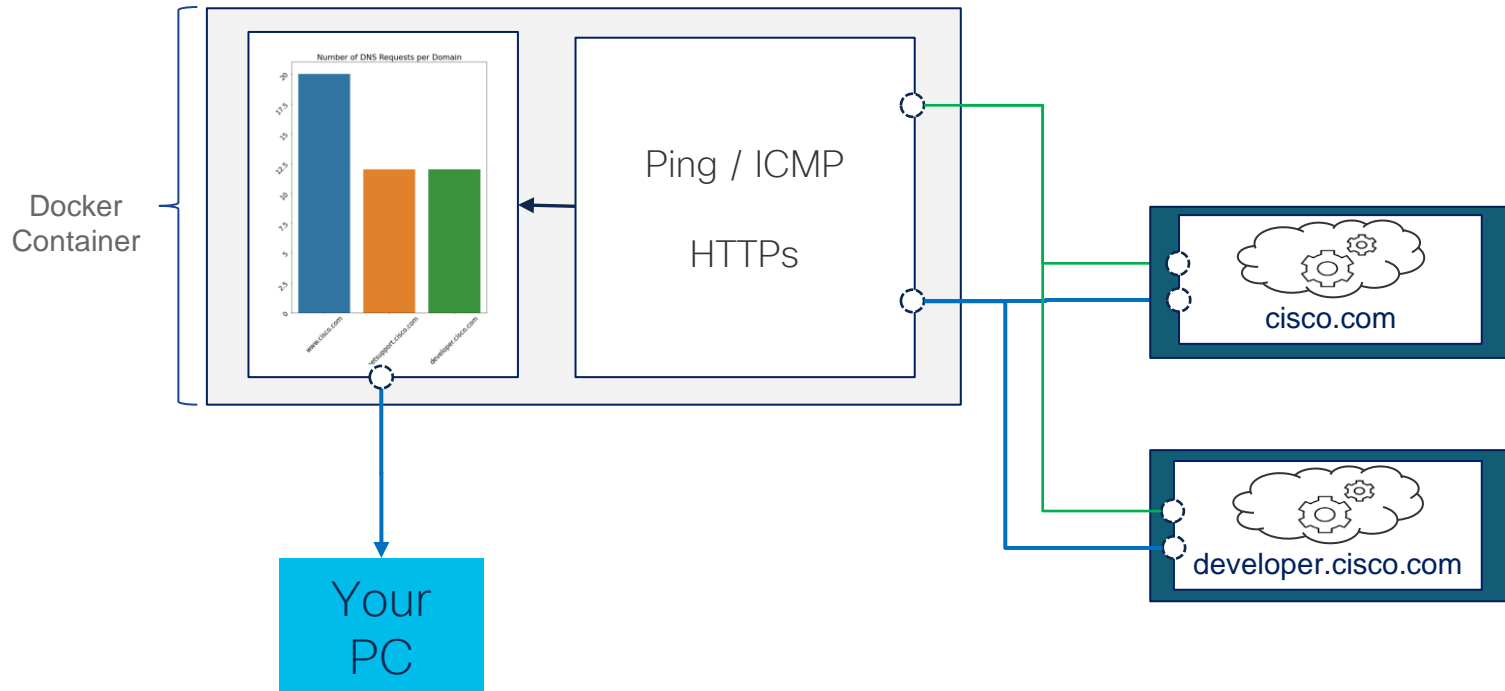

| Lab Name                                      | Version      | Description   | Reserve Button |
|---|--------------|---|----------------|
| Cisco Partner Solution: Aleantia              | Version 1.0  | Plug&Play gateway for codeless IoT integration with Cisco IOx and GMM           | RESERVE        |
| Cisco Control Center                          |              | Cisco Control Center - Multi-Operator SaaS Framework                            | RESERVE        |
| Cyber Vision                                  | Version 3.0  | Get insights from the Industrial IoT  | RESERVE        |
| Edge Intelligence                             | Version 1.0  | Extract Data from Edge to Cloud   | RESERVE        |
| Cisco Partner Solution: Eximprod              | Version 1.0  | IOx Energy Utility Solution with Eximprod                                       | RESERVE        |
| Field Network Director                        | Version 1.0  | Manage a multi-service network and security infrastructure for IoT applications | RESERVE        |
| IE3400 - Industrial Networking & Edge Compute |              | IE3400 - Industrial Networking and Edge Compute                                 | RESERVE        |
| IOx CI/CD Pipeline                            | Version 1.11 | Continuous Integration and Delivery Pipeline for Cisco IOx                      | RESERVE        |
| IOx CI/CD Pipeline                            | Version 1.7  | Continuous Integration and Delivery Pipeline for Cisco IOx                      | RESERVE        |
| IOx Latest                                    | Version 1.11 | Cisco's IoT Edge Compute Platform   | RESERVE        |

40
41 CMD ["/bin/sh", "/data/appdata/start.sh"]
```

- It is a regular Dockerfile
- Example available via github

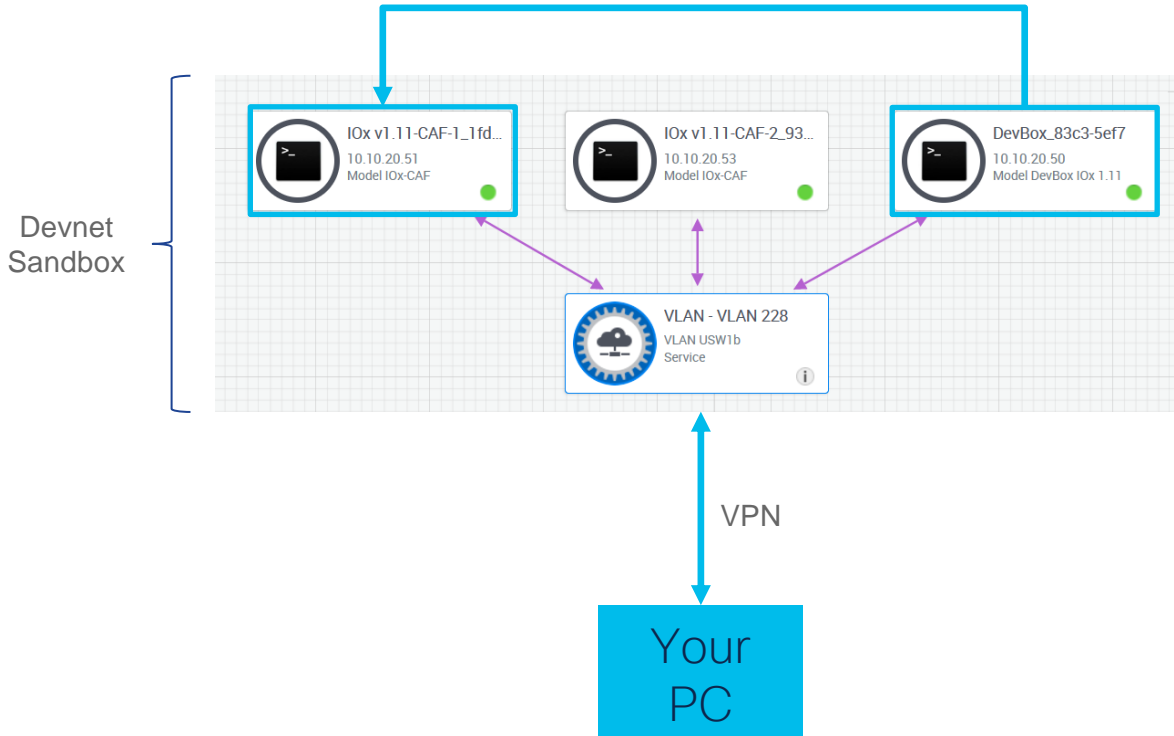

# What we heard so far ...

- **Cisco DevNet** provides you resources for education, exploration and testing
- **Cisco IOx** provides you the capability to host your application on Cisco devices
- Applications can be provided as Docker images

# Preparing and installing an application!

- The overall Setup
- Access your Sandbox
- Create your docker image
- Save your docker image
- Install your docker image to your IOx
- Access your running application

# The overall Setup

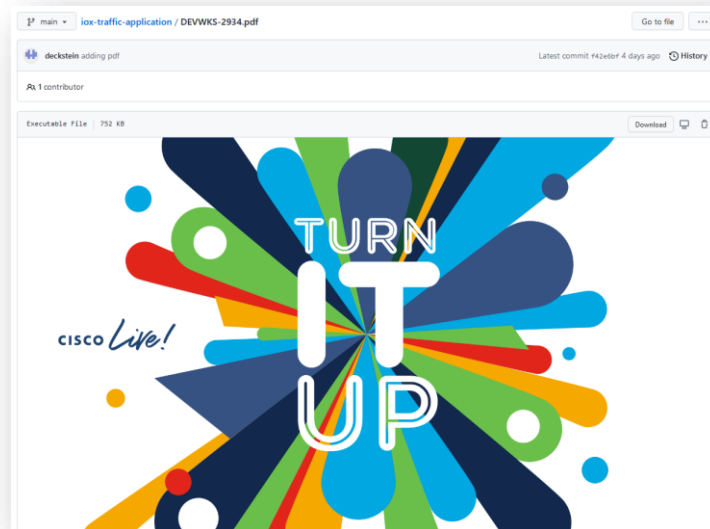

1. Get Access
2. Create Docker image
3. Create IOx application
4. Create IOx application
5. Deploy your image
6. Start your application

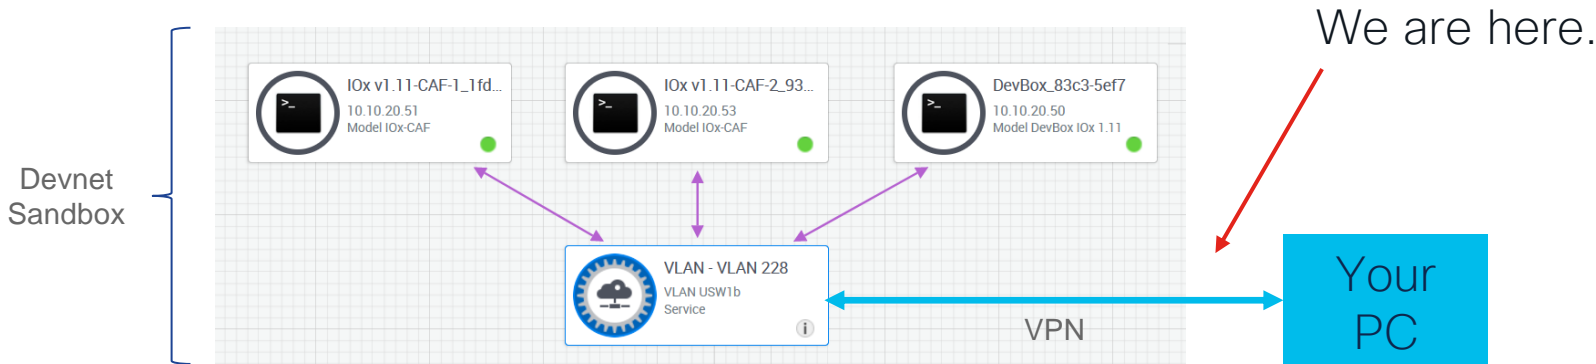

But before we start!

<https://bit.ly/cl2022-iox>

# Access your Sandbox

## Current Task:

Use Anyconnect to open a VPN connection to your sandbox.  
Please use the **VPN credentials** provided to you at your desk.

Use a terminal to log in: **ssh -l developer 10.10.20.50**

Password: **C1sco12345**

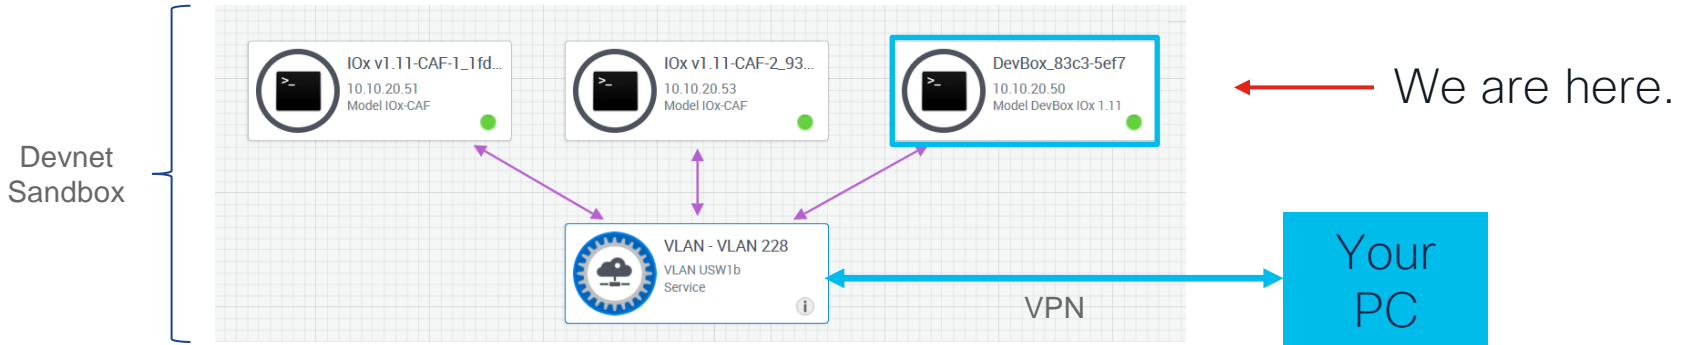

# Create your Docker Image

## Current Task:

```
git clone https://github.com/deckstein/iox-traffic-application  
cd iox-traffic-application  
docker build . --tag ioxapp  
docker image ls
```

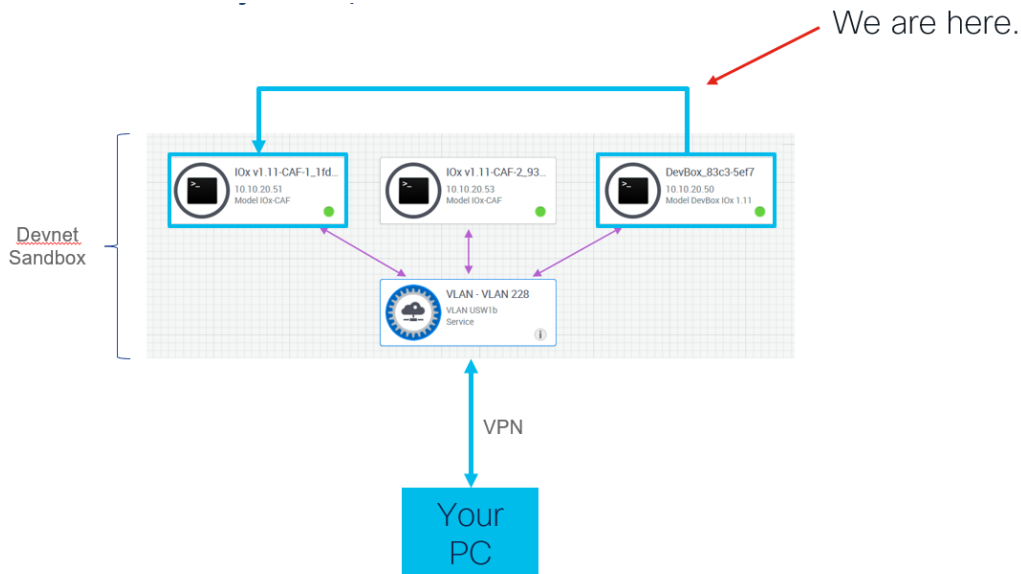

# Save your Docker Image

Current Task:

```
docker image save ioxapp -o ioxapp.tar
```

# Create your IOx profile

## Current Task:

### ioxclient

Creating one time configuration.

Your / your organization's name : **CLUS22**

Your / your organization's URL :

Your IOx platform's IP address[127.0.0.1]: **10.10.20.51**

Your IOx platform's port number[8443] :

Authorized user name[root] :

Password for root : **cisco123**

Local repository path on IOx platform[/software/downloads]:

URL Scheme (http/https) [https]:

API Prefix[/iox/api/v2/hosting/]:

Your IOx platform's SSH Port[2222]:

Your RSA key, for signing packages, in PEM format[]:

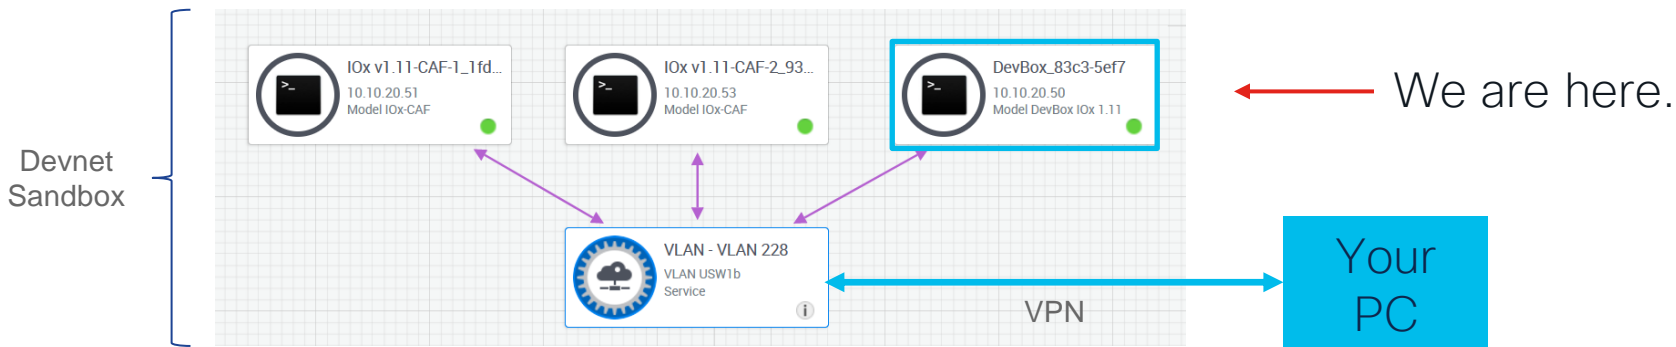

Your x.509 certificate in PEM format[]:

Activating Profile default

Saving current configuration

# Create your IOx application package

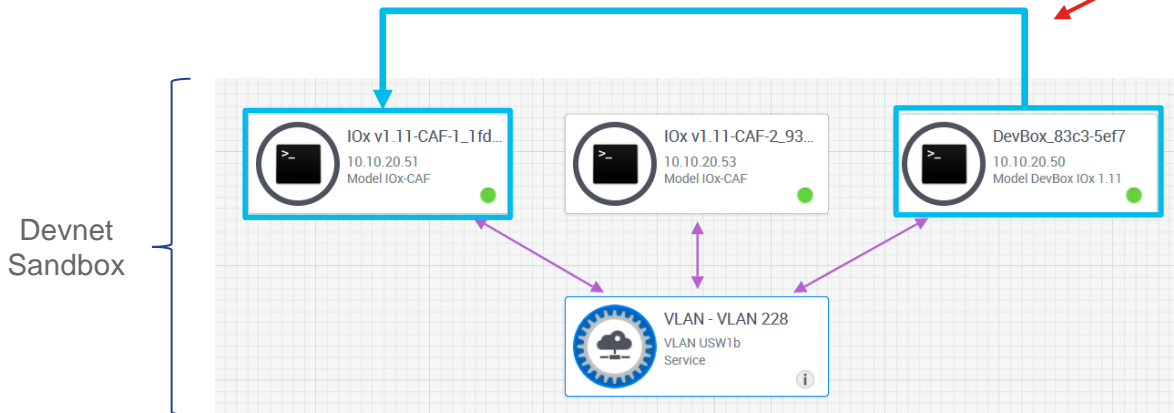

Current Task:

ioxclient docker package ioxapp.tar package/

# Deploy your IOx application package

We are here.

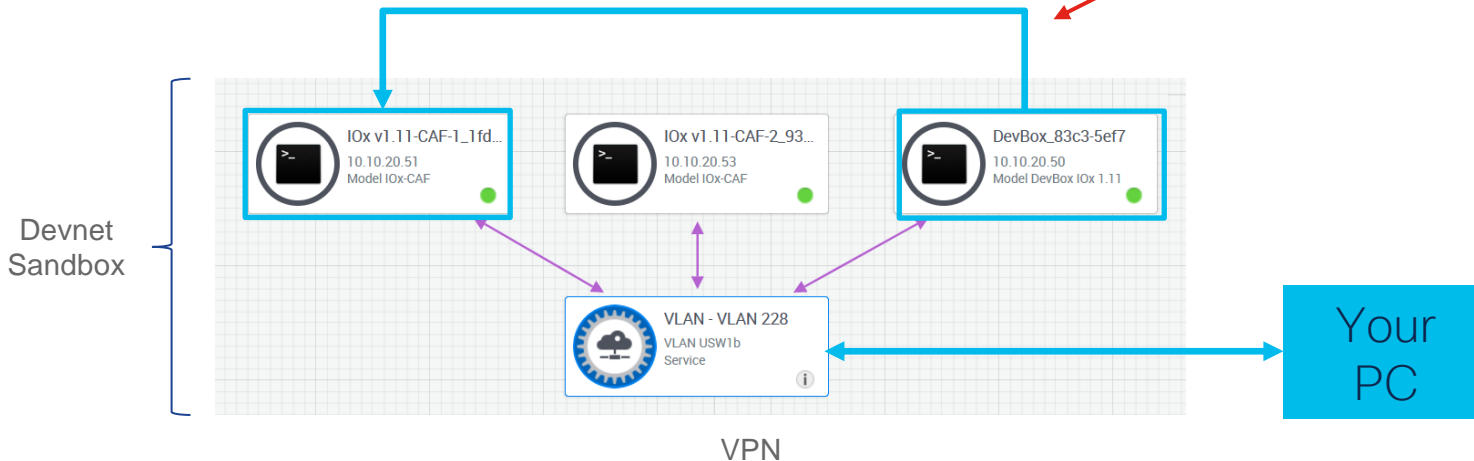

Current Task:

```
ioxclient --profile CLUS22 application install ioxapp package/package.tar
```

# Activate your IOx application

We are here.

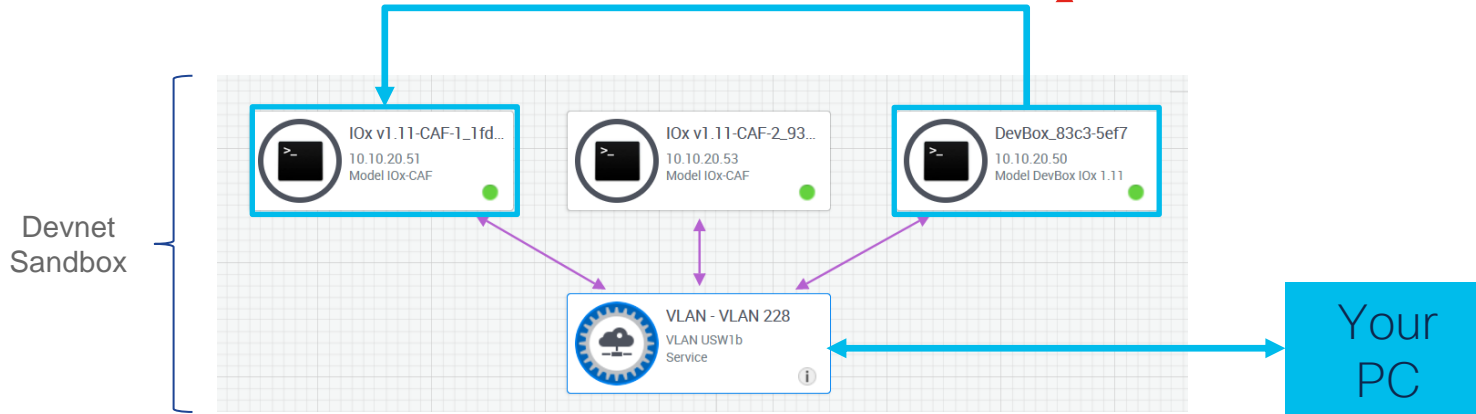

Current Task:

```
ioxclient --profile CLUS22 application activate ioxapp --docker-opts "-p 8080:8080 --dns 10.17.248.11" --payload activation.json
```

# Start your application

We are here.

## Current Task:

```
ioxclient --profile CLUS22 application start ioxapp
```

# Access your application

Point your browser to: <http://10.10.20.51:8080/>

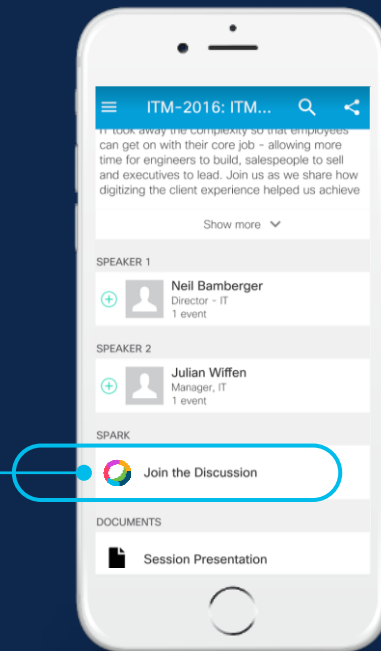

# Cisco Webex

## Questions?

Use Cisco Webex to chat with the speaker after the session

## How

- 1 Find this session in the Cisco Events Mobile App
- 2 Click “Join the Discussion”
- 3 Install Webex or go directly to the team space
- 4 Enter messages/questions in the team space

[ciscolive.ciscoevents.com/ciscolivebot/INSERT\\_SESSION\\_ID](https://ciscolive.ciscoevents.com/ciscolivebot/INSERT_SESSION_ID)

# Continue your education

Demos in the  
Cisco Showcase

Walk-In Labs

Meet the Engineer  
1:1 meetings

Related sessions

# Complete your online Session Survey

- Please complete a minimum of 4 session surveys and the overall conference survey (starting Thursday) to help us with the future planning of Cisco Live
- All surveys can be taken in the Cisco Events Mobile App or by logging in to the Session Catalog on [ciscolive.com/emear](https://ciscolive.com/emear)
- Cisco Live sessions will be available for viewing on demand after the event at [ciscolive.com](https://ciscolive.com)

The bridge to possible

# Thank you

CISCO *Live!*

The background is a vibrant, abstract composition of various colored shapes radiating from a central point. These shapes include elongated teardrop-like forms, circles, and irregular polygons in shades of blue, green, yellow, red, and dark navy. The overall effect is one of dynamic energy and modern design.
